## Tyre Stewardship Australia

This tool provides a simple framework, aligned with Scheme objectives and principles of the waste hierarchy, to represent

the environment and social impacts for end-of-life tyres

collected, processed and exported by TSA Participants.

## **Sustainable Outcomes Indicator**

- 1. EOLTs collected, processed and/or reused in Australia
- 2. 100% consumed in Australia as a high-value resource

- EOLTs collected, processed and/or reused in Australia
- 2. Consumed in Australia as a high-value resource
- 3. Overflow
  (e.g. shred, oil,
  char) exported
  to a TSA verified
  overseas
  destination

- 1. EOLTs collected, processed (e.g. shred, oil, char) in Australia, or ready for reuse
- 2. Exported to a TSA verified overseas destination

- 1. EOLTs collected and baled in Australia
- 3. Used (100%) in Australia

- 1. EOLTs collected and baled
- 2. Exported to TSA verified overseas destination
- 1. EOLTs collected and processed (shred) in Australia
- 2. Sent to landfill (legal in some States)
- 1. EOLTs baled & whole tyres exported to un-verified destination
- 2. Illegally dumped, mismanaged or stockpiled
